red Millions of Dollars Re for Boot Year.

There appears to be more than usual interest attached to the forthcoming annual report of the Commissioner of Pensions for the reason that the pension appropriation figures consepleuously in the annual budget of the Government. It has been pretty well understood for some time past that the estimates for the next fiscal year would show a large increase over any pravious year. This expectation was based on the fact of the large issue of pensions during the year consequent upon recent pension legislation, which admitted to a pensionable status a number of soldiers who were not pensionable under the former iswa. In a few days the report of General Ranm will be completed and a full statement of the condition of the Pension Office will be presented. The statements have been made that the amount that will be required for pensions during the next fiscal, year will reach nearly the enerouse sum of \$300,000,000. The work of compiling the figures is, however, sufficiently advanced to show that this estimate is in access of the sctual requirements.

this estimate is in screen of the actual re-quirements.

Since the passage of the Dieability bill there has been a rapid increase in the amount needed to pay the pensions. For the years 180-9 the total appropriation on account of pensions was about \$125, year there was an increase to \$144,000,000. Bot, as General Raum will state in his report, this amount fell short of the actual demands by about \$150,000,000, but there is a deciency of that amount.
